## **Health guidelines for personal care and body art industries**

The principle purpose of this set of guidelines is to assist those involved in the personal care and body art industry to comply with the Public Health and Wellbeing Regulations 2009 by providing information on: (1) how infection can be associated with the procedures employed in the industry, and (2) precautions to protect clients and employees.

## **Health information sheets for clients – Massage**

In Victoria there is currently no provision in the Health Act 1958 requiring massage or muscle stimulation businesses to be registered by Local Government. This fact sheet has been produced to allow those considering these procedures to make an informed decision about the process.

## **Health Guidelines for personal care and body art industries – Physical therapies**

Industry-specific requirements - Physical therapies (massage, solaria, saunas, flotation tanks, spas and pools, gymnasium equipment and alternative therapies)

## **Blue book – Guidelines for the control of infectious diseases**

The blue book: guidelines for the control of infectious diseases has been published by the Communicable Disease Prevention and Control Unit Victorian Department of Health, to assist public health practitioners in the prevention and control of infectious diseases.

The Department of Health is committed to enhancing and protecting the health and well-being of all Victorians. Our challenge, together with public health practitioners, is to monitor, prevent and control current and emerging communicable diseases within the Victorian community through the implementation of targeted public health strategies based on surveillance and risk assessment in a partnership approach.
